

MERYEM MIRGHANY

Digital Transformation | Business Process Optimization | AI & Data Solutions

+212 632 592 233 | mery.mirghany@gmail.com | [Portfolio](#) | [LinkedIn](#) | Casablanca, Morocco

PROFILE

MIAGE Engineer specializing in digital transformation and business process optimization. My experience at Deloitte and Auto Hall has enabled me to design and deploy integrated solutions combining business analysis, process automation, data processing, and business intelligence dashboards. I operate at the intersection of business objectives and technical implementation to design solutions that sustainably improve processes and decision-making.

EDUCATION

Software Engineering & Networks — MIAGE Specialization

EMSI — Moroccan School of Engineering Sciences

High School Diploma in Physical Sciences — High Honors

Lahlou Educational Group

2021 – 2026

Casablanca

2021

Casablanca

PROFESSIONAL EXPERIENCE

Deloitte Extended Services

Feb. 2026 – Present

Digital Transformation Intern — HR Control & Benefits Management

Casablanca

- Centralized and automated a previously decentralized HR process, reducing processing time from 3 hours to under 5 minutes and standardizing practices across 30+ organizational entities.
- Analyzed the annual salary review process to identify critical steps, operational risks, and automation opportunities.
- Designed and deployed a solution (Python/Django) integrating business rules, process automation, and business intelligence dashboards to support HR teams in their decision-making.
- Modeled data flows and implemented necessary controls for secure processing of compensation data in compliance with confidentiality requirements.
- Supported business teams in solution validation, documentation, and adoption by taking into account change management concerns and user engagement.

Auto Hall Group

Jul. 2025 – Aug. 2025

Business Intelligence & Process Automation Intern

Casablanca

- Developed PowerGLPI to automate GLPI data extraction and improve IT operations management.
- Designed an ETL pipeline structuring data for Power BI dashboard provisioning.
- Reduced reporting production time by 90% by eliminating manual data entry.
- Participated in design, testing, and production deployment in an Agile Scrum environment.

PERSONAL PROJECTS

Change Readiness Score — Digital Maturity Diagnostic Tool

Python, NLP, scikit-learn, Power BI

- Designed a scoring tool assessing an organization's digital maturity and change readiness, structured around 5 key dimensions (leadership, culture, technical infrastructure, data maturity, team adoption).
- Developed a text analysis module (NLP) processing open-ended employee responses to detect change resistance signals beyond traditional declarative scoring.
- Built visual reporting (radar chart by dimension) accompanied by prioritized recommendations, enabling rapid identification of key action levers.
- Stack: Python (scoring and NLP processing), scikit-learn, Power BI (visualization), methodology inspired by change management frameworks (ADKAR, McKinsey 7S).

Mapping and Digitalization of Internship Agreement Management Process

Bizagi Modeler, BPMN 2.0

- Mapped the current state (AS-IS) internship/capstone agreement management process at EMSI, identifying friction points (delays, manual exchanges, lack of centralized tracking).
- Proposed a future state (TO-BE) digitalized process with structured approval workflow and centralized tracking.
- Deliverable: AS-IS/TO-BE mapping using Bizagi Modeler + prioritized recommendations.

EXPERTISE

Business Process Excellence

Business analysis, process mapping (BPMN 2.0), workflow optimization, organizational change management, KPI definition

Data & Decision Support

SQL, data modeling, Power BI (DAX, Power Query), business intelligence dashboards, performance indicators, business intelligence

AI for Business

AI use case identification, opportunity evaluation, AI governance, intelligent process automation

Technical Implementation

Python, business application design, REST APIs, ETL/ELT pipelines, data integration, process automation

Cloud & Infrastructure

Microsoft Azure, GCP, Docker, data management in cloud environments

Agile & Project Management

Agile Scrum, Jira, Git, functional and technical documentation

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900) • Microsoft Power BI Data Analyst • Bizagi BPMN Process Modeling Academy • SAP Business Analyst • McKinsey Forward Program
